

SKYLINE™
ELEVATORS
To Infinite Heights...

Quality, Service & Enhanced Performance

BENEFITS OF SKYLINE

Value for money

The optimum combination of cost and quality to meet the user's requirement. It can be assessed using criteria of economy, efficiency and effectiveness. We try our best to fulfill your needs.

Smoother

Skyline elevator system gives passengers a higher level of comfort and speed. Aerodynamic car and cab designs combined with state of the art guidance provide superb ride quality. Compass Plus Destination Management provides passengers with the fastest, most direct and least crowded route to their destinations.

Safer

The skyline elevator system raises the bar for safety and quality standards. Skyline products are globally engineered and rigorously tested. The Skyline Control System monitors safety circuits and performance and operational settings hundreds of times per second.

Smaller

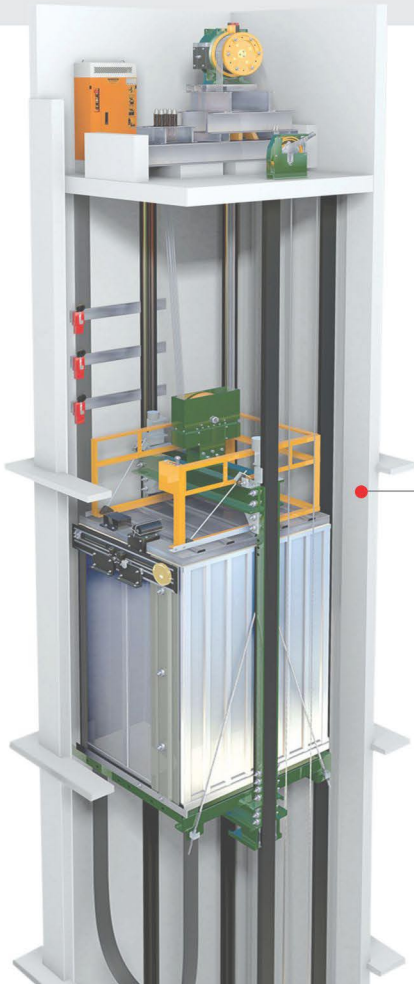

Skyline's pioneering technology gives you greater energy and space efficiency. Compact permanent magnet machines combined with Regen Drives provide clean, green elevator propulsion in a small package to free up valuable building space.

Better

Your project will reach new heights with Skyline project management and installation. Skyline project teams partner with you to develop innovative solutions throughout the complexities of a high-rise project. Skyline project managers are trained thoroughly at our Major Project managers are trained thoroughly at our Major Project Management University. We are committed to your success.

With Machine Room Elevators

Skyline Lifts with machine room arrangement available in geared and gearless drive technology.

With machine room elevators consist of a separate machine room and requires an extension on any side of the hoist way for placing machine and controller.

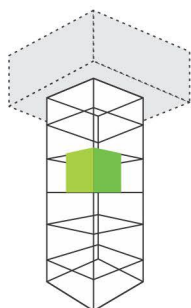

ECO Friendly 

Machine Room Less Elevators

Skyline machine room less elevators cancels the machine room, reduce the construction cost and flexibly utilizes the effective space.

Arrangement require compact gearless motor to be placed in the lift shaft which eliminates the need of machine room.

In a way, it allows the architects and developers to conduct designing in a freer way.

Machine Room of the Ordinary Elevator

Tasks

Kitchen Elevators

Dumb waiter systems have always been critical in restaurants, hotels and other food service to make sure the food gets to the customer piping hot and without getting dropped on the stairs, and in all cases the service lift is about the right tool for the job, keeping any passenger lifts clear of “backstage” work going on and designed to take up a minimum of space with a maximum of load carrying capability.

Panoramic Elevators

Another name of the panoramic elevator is the travel elevator. It not only allows passengers to experience a safe and comfortable transportation experience, but also adds aesthetics to your building with its beautiful and elegant appearance. Therefore, they are elevators worth investing in terms of commercial value.
